# DELIVERABLES

10 HOURS OF LIVE TRAINING WITH A FIELD EXPERT  
PRACTICING WITH A REAL CASE STUDY.  
CERTIFICATE OF COMPLETION – 10 CPES  
DATA ANALYTICS  
POWER QUERY  
DYNAMIC ARRAYS  
ARTIFICIAL INTELLIGENCE (AI) IN EXCEL  
PIVOT TABLES USING BUSINESS INTELLIGENCE (BI)  
POWER PIVOT  
CREATING MEGA FORMULAS  
MACRO (INTO LEVEL)  
AND MUCH MORE ...

## WORKSHOP TOPICS COVERED

### PIVOT TABLE & AI

- Pivot AI - Analyze Data (Ideas)
- Creating a Table from a Data Source
- Slicers for Criteria Filtering
- Creating new Analytics using Formulas
- Charts from Tables
- Dashboard Presentation
- Data Manipulation
- Report Presentation
- Refresh & Update

### POWER QUERY

- Connect Multiple Data Sources
- Sources: Excel Files, CSV Files, Databases, Cloud-Based Data
- Clean & Transform Data
- Remove Duplicates, Split Columns, Merge Tables
- Merge Data from Multiple Sources
- Load Data into Excel
- Automate Data Transformation
- Power Pivot from Power Query
- Graphical Designs

### MACRO

- Record Macro
- Check Box (From Control)
- Spin Button (From Control)
- Option Button (From Control)
- Scroll Bar (From Control)

### DYNAMIC ARRAYS - OFFICE 365

- UNIQUE
- SORT
- SORTBY
- FILTER
- RANDARRAY
- LET
- XLOOKUP
- SEQUENCE

### POWER PIVOT

- Creating Pivot Tables using Power Pivot
- Merging Data
- Connecting Files from Multiple Sources
- Combines Files: Databases, Excel Files, CSV, etc.
- Calculation of New Headers & Options
- KPI builder for Performance
- Slicers
- Building Relationships One-to-one, one-to-many, many-to-many
- Name Manager
- Filtering, Sorting, Grouping
